PROFESSIONAL EXPERIENCE

Full Stack Developer (Frontend-Led) | **Finn** Dec 2024 – Present

India | Full-time

- Architected the full-stack frontend foundation from scratch with React.js, Next.js (App Router), TypeScript and Tailwind CSS for scalable fintech applications.
- Improved page load times by ~40% through lazy loading, code splitting and image optimization, raising Core Web Vitals scores and user retention.
- Built and maintained a shared design system and component library (20+ reusable, modular components), speeding up team development and keeping the UI consistent.
- Integrated OpenAI APIs into AI-powered hiring workflows, delivering LLM-driven automation that reduced manual screening effort and increased recruiter productivity.
- Partnered with backend and AI teams to connect REST APIs and SQL-based data flows through Azure APIs, ensuring reliable end-to-end data exchange.
- Sole full-stack developer of Pillar Bridge Solutions (pillarbridgesolution.com), a client platform built with Next.js, TypeScript and Supabase (PostgreSQL): role-based dashboards for six user types, secure authentication with Row-Level Security, Airwallex payments with webhooks, real-time messaging (Socket.IO), notifications and file uploads.
- Managed CI/CD pipelines with GitHub Actions and automated Vercel deployments, enabling zero-downtime releases and less deployment friction.

Freelance Full Stack Developer | **Independent** Dec 2021 – Dec 2024

India | Remote

- Designed and delivered 10+ responsive web applications and SPAs for remote clients, owning each project from requirements gathering to deployment.
- Built REST API integrations, authentication flows (JWT, OAuth) and backend data handling with Node.js and Laravel, connecting frontend interfaces to server-side logic.
- Applied code splitting, lazy loading and CDN strategies to consistently achieve sub-2-second load times across client projects.
- Delivered 100% of projects on deadline over 3 years, working autonomously in Agile workflows and communicating across time zones.

Frontend Developer (Internships & Early Roles) | **BrandsOverMoon, Makos Infotech, TechEra, The Renal Project, Tata Steel** Jan 2019 – Dec 2021

India | Onsite / Hybrid

- Developed responsive UIs with HTML5, CSS3, JavaScript, jQuery, PHP and Laravel for healthcare, manufacturing and B2B clients, improving SEO performance and accessibility.
- Built a foundation in cross-browser compatibility, mobile-first design and performance profiling across industries, leading into full-stack work.

PROJECTS

Weather Watch: Real-Time Weather Dashboard | TypeScript, React.js, Next.js, REST APIs

- Built a real-time weather dashboard with dynamic data fetching, location-based search and a responsive UI optimized for all devices.
- Implemented server-side rendering (SSR) in Next.js for fast initial loads and strong SEO.

WordGame: Cross-Platform Browser Game | JavaScript, React.js, Tailwind CSS, REST APIs

- Developed a responsive cross-platform word game with API-driven game logic, state management and animated interactions using Framer Motion.

My IB Course Platform: LMS / Coursework Manager | JavaScript, TypeScript, Next.js

- Designed and built a coursework management and evaluation platform with role-based access control (RBAC), dashboard analytics and a modular component system.
